Profile Summary

DevOps and Cloud enthusiast with hands-on experience in AWS, Docker, Kubernetes, CI/CD pipelines, Linux, and automation tools. Skilled in cloud infrastructure, containerization, deployment automation, backend development, networking, and database management. Experienced in building scalable applications and implementing secure, reliable, and automated software delivery workflows. Strong foundation in Java, Python, networking, OOP, DSA, and problem solving.

Experience

DevOps Training & Internship Trainee

Mar 2026 – Present

Skilleected Edu Pvt. Ltd., Pune

- Completed a 6-month training and internship program gaining hands-on experience with DevOps fundamentals, CI/CD pipelines, Git version control, cloud computing, Linux, automation, and software development workflows.
- Worked on practical tasks involving build and deployment processes, automation, version control, and collaboration tools, strengthening understanding of the end-to-end software development and delivery lifecycle.

Skills

Programming Languages: Java, Python, JavaScript, SQL, Bash Scripting

Web Technologies: HTML, CSS

Database: MySQL

Cloud & DevOps: AWS (EC2, S3, RDS, VPC, ALB, Auto Scaling), Docker, Kubernetes, Terraform, GitHub Actions

Tools: Linux, Git & GitHub, VS Code, Maven, PM2, Nginx

Core Concepts: Object Oriented Programming (OOP), Data Structures & Algorithms, Computer Networking, Database Management Systems, Operating Systems, CI/CD

Projects

Java Network Packet Analyzer

GitHub

- Developed a network packet analyzer from scratch using Java and networking concepts, supporting PCAP file processing, IPv4, TCP/UDP packet parsing, and five-tuple based network flow tracking.
- Developed a rule-based traffic filtering system to block traffic based on IP address, application, and domain, and added multithreaded packet processing using Java `ExecutorService`.

AWS Three-Tier Web Application

Documentation

- Designed and deployed a three-tier web application architecture on AWS with separate Web, Application, and Database layers using EC2, ALB, RDS MySQL, VPC, and Security Groups.
- Deployed the application using Nginx, Node.js, and PM2, with Nginx configured as a reverse proxy, and connected the application tier securely with Amazon RDS MySQL.

DevSecOps CI/CD Pipeline with Automated Security Scanning

GitHub

- Built a GitHub Actions CI/CD workflow integrating Semgrep, npm audit, and Gitleaks to automate static code analysis, dependency vulnerability scanning, and secret detection on every push.
- Implemented automated security checks in the software delivery pipeline to identify code vulnerabilities, vulnerable dependencies, and exposed secrets before deployment.

Education

JSPM's Bhivarabai Sawant Institute of Technology & Research, Pune

Nov 2022 – July 2026

BE Computer Engineering

CGPA: 7.98

Sri Chaitanya Junior College, Pune

Jun 2020 – Apr 2022

HSC Class XII

80.33%

Oxford English Medium School, Chopda, Jalgaon

Jun 2015 – Mar 2020

CBSE Class X

79.40%

Achievements & Certifications

- Completed 6-month DevOps internship at Skilleected with hands-on experience in CI/CD, Git, cloud, Linux, and automation.
- Core Java Course Completion Certificate – CodeForSuccess.
- HTML, CSS, JavaScript Course Completion Certificate – Udemy.
- Solved 75+ problems on LeetCode.
