Profile Summary

Software Development enthusiast with hands-on experience in Java, AWS, DevOps, Docker, Kubernetes, CI/CD, Linux, and backend development. Skilled in developing and deploying scalable applications, implementing cloud infrastructure, containerizing applications, and automating software delivery workflows. Experienced with Git, GitHub Actions, Maven, Nginx, and AWS services including EC2, S3, RDS, VPC, and ALB. Strong foundation in OOP, DSA, SQL, networking, and problem solving.

Education

Savitribai Phule Pune University, Pune BE Computer Engineering	Nov 2022 – July 2026 CGPA: 8.00
Sri Chaitanya Junior College, Pune HSC Class XII	Jun 2020 – Apr 2022 80.33%
Oxford English Medium School, Chopda, Jalgaon CBSE Class X	Jun 2015 – Mar 2020 79.40%

Projects

Java Network Packet Analyzer

[GitHub](#)

- Developed a network packet analyzer from scratch using Java and networking concepts, supporting PCAP file processing, IPv4, TCP/UDP packet parsing, and five-tuple based network flow tracking.
- Developed a rule-based traffic filtering system to block traffic based on IP address, application, and domain, and added multithreaded packet processing using Java `ExecutorService`.

AWS Three-Tier Web Application

[Documentation](#)

- Designed and deployed a three-tier web application architecture on AWS with separate Web, Application, and Database layers using EC2, ALB, RDS MySQL, VPC, and Security Groups.
- Deployed the application using Nginx, Node.js, and PM2, with Nginx configured as a reverse proxy, and connected the application tier securely with Amazon RDS MySQL.

DevSecOps CI/CD Pipeline with Automated Security Scanning

[GitHub](#)

- Built a GitHub Actions CI/CD workflow integrating Semgrep, npm audit, and Gitleaks to automate static code analysis, dependency vulnerability scanning, and secret detection on every push.
- Implemented automated security checks in the software delivery pipeline to identify code vulnerabilities, vulnerable dependencies, and exposed secrets before deployment.

Experience

DevOps Training & Internship Trainee

May 2026 – Present

Skillested Edu Pvt. Ltd., Pune

- Currently pursuing DevOps training and internship, gaining hands-on experience in CI/CD pipelines, Git version control, AWS cloud computing, Linux, automation, and software development workflows.
- Working on practical tasks involving build and deployment processes, automation, version control, and collaboration tools, strengthening understanding of the end-to-end software development and delivery lifecycle.

Java Full Stack Intern

Jun 2026 – Aug 2026

Zidio Development Pvt. Ltd.

- Contributed to Java Full Stack project work, gaining practical experience in application development, software development workflows, and project implementation.
- Applied Java programming, object-oriented programming, debugging, and problem-solving concepts while completing assigned development tasks and demonstrating professionalism, dedication, and integrity throughout the internship while maintaining quality and meeting project requirements effectively.

Skills

Programming Languages: Java, Python, JavaScript, SQL, Bash Scripting**Web Technologies:** HTML, CSS**Database:** MySQL**Cloud & DevOps:** AWS (EC2, S3, RDS, VPC, ALB, Auto Scaling), Docker, Kubernetes, Terraform, GitHub Actions**Tools:** Linux, Git & GitHub, VS Code, Maven, PM2, Nginx**Core Concepts:** Object Oriented Programming (OOP), Data Structures & Algorithms, Computer Networking, Database Management Systems, Operating Systems, CI/CD

Achievements & Certifications

- Successfully completed a Java Full Stack Internship at Zidio Development Pvt. Ltd.
- Core Java Course Completion Certificate – CodeForSuccess.
- HTML, CSS, JavaScript Course Completion Certificate – Udemy.
- Solved 75+ problems on LeetCode.
